

1/20/2012

Hi Everyone,

It has been brought to the attention of the Engine Committee that Zenoah has come out with a new carburetor that is a copy of the Walbro 257. Roger Pane has inspected and measured it and has informed us that the dimensions are the same as the 257.

Therefore the committee has decided that this carburetor (WT-1027 Racing Carb) will be allowed for use in District 19 in the Classic Thunderboat starting at the Lake Havasu race.

Please keep in mind, just as the 257 cannot be modified, this carburetor cannot either, and is subject to inspection. These 2 carburetors along with the stock 644 carburetor are allowed in this class in District 19. If you go outside the district to race it will be subject to DQ.

If you have any questions, feel free to give Roger Pane or myself a call.

Ted McKay
District 19 Director
